

What is...

premium care

Our office believes you deserve to know! Watch our YouTube video on our website TurnerDentalCare.com to find out.

invisalign | teen

Does your teen need braces but doesn't want the same traditional metal. Invisalign teen is the perfect option. When it is time for that formal dance or photo shoot, just take them off and their smile looks fantastic.

ONE-HOUR WHITE

It is an in-office option for getting your teeth about 10 shades lighter in a short visit. We use a prescription only solution to maximize your whitening experience and make your smile shine.

What does *your* smile say?

A recent study shows that your smile reveals more about you than you may think. 1.) Two different researches found that older people who had a big grin in their school yearbooks when they were young remained married later in life four times more often than non-grinners. 2.) Multiple studies show that a healthy smile can reflect your overall health. For women, smiles can even reveal fertility; women with gum disease take an average of two months longer to conceive than women without. Also, gum disease is linked to an increased risk of heart disease, Type 2 diabetes, respiratory disease, and kidney disease.

3.) A teenager's grin can predict how much cash he or she will rake in as an adult. According to a study published in 2012, happy teens earned 10 percent more income than average at age 29, while gloomy adolescents earned 30 percent less than average at that age. 4.) Smiles are also a sign of social status. Some findings suggest that powerful people have the privilege of smiling when they please, whereas those with less power are obligated to smile in order to ingratiate themselves.

The takeaway is:

Let's get you a healthy happy smile!

DR. TURNER'S TOP 10... "REASONS TO SMILE"

1. Smiling makes us attractive.

We are drawn to people who smile. There is an attraction factor. We want to know a smiling person and figure out what is so good. Frowns, scowls and grimaces all push people away -- but a smile draws them in.

2. Smiling changes our mood

Next time you are feeling down, try putting on a smile. There's a good chance your mood will change for the better. Smiling can trick the body into helping you change your mood.

Read the other 8 reasons on our website at www.turnerdentalcare.com/top-10, you might be a little surprised to see what is on the list.

IMPLANTS *get your smile back*

Today, we have the ever-evolving technology to use implants to restore a missing or damaged tooth, several teeth and even a full set of teeth. Using advanced materials and techniques, these restorations can be stronger and more reliable than natural teeth while being just as cosmetic.

Among the most exciting aspects of this treatment modality is the Fixed Hybrid Appliance, also known as the All-on-Four procedure. This treatment concept allows us to remove any existing damaged teeth, place implants and, often, secure a full upper and lower set of replacement teeth that are not removable all in one visit while the patient is asleep.

Implants look and feel more like real teeth than any other restoration option.

The Fixed Hybrid Appliance is ideal for patients experiencing severe tooth loss resulting from gum disease, patients with significant tooth destruction or wear and those patients who have ill fitting or uncomfortable removable dentures.
